In re application of

Carl A. Reiser

Docket No.: C-3363

Serial No.: 10/765,737

Art Unit: 1745

Filed: January 27, 2004

Examiner: O'Neill, Karie Amber

Title: Preventing Fuel Starvation of a  
Fuel Cell StackPoints for Discussion at Interview 7/26/07, 10AM

1. Making rejection final upon first requirement to restrict and withdrawal.
2. Summarily dismissing a Declaration under Rule 132 made under the penalties of perjury.
3. Referring to two references in response to arguments, which references are not cited against the claims in the -103 rejections.
4. Failing to limit the interpretation of references to be relevant to the claimed subject matter.
5. The fact that new claims 4 and 5 are neither capable of being performed by or of performing, respectively, apparatus or methods which are materially distinct, per MPEP 806.03.
6. That there is no prior art with respect to sensing flow and disconnecting in the absence thereof.
